

CSS452 Internet of Things

Exercise 4: ESP32 – MQTT Clients

1. Work as a group of two students. We will use **two** ESP32. Do the project in Section 3 in Lecture Note 6 as shown in Pages 16 – 35. Take a video to show
 - circuit connection,
 - Arduino code,
 - demonstration:
 - rotate the knob of the potentiometer (connected to the publisher node) to turn on the LED (connected to the subscriber node),
 - rotate the knob of the potentiometer (connected to the publisher node) to turn off the LED (connected to the subscriber node).

Name it as Q1. Submit the video to the Google Classroom.
